

Stormwater fees are used to maintain and upgrade many systems including the large underground pipes that carry stormwater to the river.

Stormwater Fees

All developed properties in Eugene pay stormwater fees that support the operation, maintenance and restoration of the city's stormwater system. The stormwater system includes pipes, catch basins, manholes, drywells, water quality facilities, wetlands, waterways and roadside ditches that receive and transport stormwater runoff to local area waterways including Amazon Creek and the Willamette River, and in some cases infiltrate runoff into the soil. Services funded by the stormwater fees include flood control and drainage, water quality protection and restoration, and the protection and improvement of wetlands and waterways for their stormwater benefits.

Beginning in July, 2012, stormwater rates will increase by 4.5%, or \$0.50 per month for the majority of residential customers. Other user categories will see an increase of \$0.19 per thousand square feet of impervious area. This increase is needed in order to sustain current services.

Use of Stormwater Fees

Stormwater Monthly Fee Schedule (effective July 2012)

Fees for residential stormwater customers are based on the size of the building footprint. Footprint is the combined square footage of the garage/carport and the first floor of the home.

User Category ¹	Small Residential ²	Medium Residential ³	Large Residential ⁴	General Customers ⁵ Commercial/Industrial
Rate Components:				
Impervious Surface	\$5.78	\$9.31	\$3.21 per 1,000 sf	\$3.21 per 1,000 sf
Street-Related	\$1.60	\$1.60	\$1.60	\$1.13 per 1,000 sf
Administrative (per account)	\$0.48	\$0.48	\$1.49	\$1.49
Total Monthly Fee	\$7.86	\$11.39	Varies	Varies

Users may qualify for reduced stormwater fees if the quantity of stormwater discharge to the public system is reduced or the quality impact is reduced through on-site stormwater treatment.

¹ Duplex rates are modified, based on the building footprint and building configuration

² Building footprint is equal to or less than 1,000 square feet (sf).

³ Building footprint is greater than 1,000 sf and less than 3,000 sf.

⁴ Building footprint is 3,000 sf or greater

⁵ All users other than single family homes and duplexes are considered General Customers

Total Stormwater Budget = \$18,217,738 (FY13)

Stormwater fees are used to:

- Maintain and rehabilitate more than 570 miles of stormwater pipes and waterways
- Clean over 14,700 catch basins and curb inlets
- Collect and recycle over 18,000 cubic yards of leaves per year
- Eliminate illegal connections and discharges
- Sweep more than 36,000 curb miles of streets each year
- Provide stormwater education to 3,000 students each year
- Protect, restore and maintain wetlands and waterways
- Enhance the quality of stormwater runoff from developed areas by constructing capital restoration projects
- Replace public drywells to protect groundwater quality
- Administer stormwater regulations related to certain industries, all construction activities and most new residential, commercial and industrial development
- Preserve and maintain street trees and median vegetation
- Monitor water quality in our local waterways through sampling and data analysis

Stormwater from rain and runoff flows directly from storm drains to waterways (creeks, rivers).

It is not treated.

City Fees on EWEB Bill

The City of Eugene adopts and administers the stormwater and wastewater service fees. EWEB has no relationship with the City's wastewater or stormwater system operation or rates and acts only as the City's billing agent.

Wastewater fees

All properties connected to the public wastewater system pay wastewater fees. Eugene provides local wastewater collection services, and the Metropolitan Wastewater Management Commission (MWMC) operates the regional wastewater collection and treatment facilities. The MWMC approved a four percent increase in regional rates, and the City Manager approved a three percent increase in local rates, effective on bills issued on and after July 1, 2012. For a typical residential customer, this equates to a monthly increase of about \$1.16.

The purpose of the regional wastewater program is to protect public health and safety and the environment by providing high-quality wastewater management services to the Eugene-Springfield metropolitan area. MWMC’s regional wastewater rate increase is necessary to fund operation and maintenance of the existing wastewater treatment facilities and implement planned capital improvement projects. The regional wastewater facilities were designed in the late 1970s to serve the community for 20 years. In 2004, the MWMC adopted a Facilities Plan that identifies cost-effective solutions for the region’s wastewater needs projected through 2025. The MWMC is investing in significant improvements to provide capacity for community growth, avoid raw sewage overflows caused by rainy weather, and meet new, more stringent regulatory requirements to protect the Willamette River. Both user fees and systems development charges will provide resources to support these investments.

The regional wastewater program is complemented by local collection systems and pump stations maintained by the cities of Eugene and Springfield. The increase in Eugene’s local wastewater user fees is necessary to maintain current operating service levels while also funding necessary capital improvements. Both cities are committed to funding capital improvements which will reduce the amount of stormwater entering the collection system during peak wet weather periods. Wastewater service fees are billed to all users connected to the Eugene/Springfield wastewater

Capital improvement projects for wastewater treatment systems are investments in the long-term health of our region

collection and treatment facilities (Eugene Code 6.401-6.471). Customers pay a combined fee which includes:

- A basic MWMC (regional) charge of \$11.34 per month (reflects the four percent increase noted above);
- A flow-based fee, calculated on the amount of water used and customer category. The flow-based fee is the combination of City of Eugene and MWMC (regional) wastewater service rates per 1,000 gallons (1 kgal) of water used. Customer categories are based upon the strength and characteristics of wastewater discharged to the public sewer system.

How Wastewater Fees are Used

Local and regional wastewater fees pay for the collection and conveyance of wastewater and for the operation and maintenance of the regional wastewater treatment facilities.

- Maintain more than 800 miles of wastewater lines
- Operate and maintain 30 pump stations (26 local, 4 regional)
- Inspect/clean almost 390 miles of wastewater lines per year
- Invest in capital improvements
- Treat 13.6 billion gallons of wastewater per year
- Conduct over 25,000 water quality tests
- Process 4,800 dry tons of biosolids per year

Wastewater Flow-Based Fee (per 1,000 gallons, effective July 2012)						
Service Category	Residential Customer	Commercial/Industrial Customers				
		Low Strength 400*	Medium Strength 800*	High Strength 1,200*	Very High Strength 1,600*	Super High Strength over 1,600*
MWMC (regional)	\$2.255	\$3.032	\$4.418	\$6.267	\$8.124	\$9.976
City of Eugene (local)	\$1.961	\$1.961	\$1.961	\$1.961	\$1.961	\$1.961
Total	\$4.216	\$4.993	\$6.379	\$8.228	\$10.085	\$11.937

*Combined biochemical oxygen demand and suspended solids in milligrams per liter (mg/L)

Wastewater Bills Vary Summer to Winter

Eugene uses a flow-based averaging procedure that acknowledges that some of the water used during summer months (May – November) may not enter the wastewater system. Wastewater charges for these months are based on the previous winter’s average monthly use or on the actual water used, whichever is less. Wastewater charges on bills issued during the winter months (December – April) are based on actual water meter readings.

Typical Residential Monthly Bill (assumes 5,000 gallons monthly usage)	
Basic Charge (MWMC):	\$11.34
Flow-Based Fee (MWMC):	\$11.27 (\$2.255 x 5 kgal)
Total Regional Fee:	\$22.61
Flow-Based Fee (City):	\$9.81 (\$1.961 x 5 kgal)
Total Monthly Fee:	\$32.42

Wastewater from building plumbing (laundry, sink, toilet, bath) ***must be treated*** before it is discharged to waterways.
